I am a Senior Management Consultant and Project Director with based in Winter Haven, Florida. I deal with issues and solutions to problems in the areas of Information Lifecycle Data Management, electronic business transaction flow and business intelligence data storage & retrieval. With a focus on enterprise-wide business analytics I address the institutional challenges to reform the business processes across the board. I am a leader in the organizational challenge to move from a siloed approach to more inclusive information management programs that work across the entire company

As an experienced computer system's professional functioning as an information and data architect, I have gained valuable skills and knowledge by working in a wide range of industries and applying a varied set of technology solutions to complete project tasks and resolve client problems. My employment and consulting history include such businesses as Manufacturing/Distribution, Pharmaceuticals, Oil & Gas, Petrochemical, Telecommunications, Public Accounting, Banking and Finance, Resort and Hotel Management, and Retail Sales and Distribution. Within these organizations, I have performed in positions as Programmer Analyst, Project Manager, Operations Director and Director of Development.

During my career, I have enjoyed an in-depth involvement with a varied set of technologies and utilized them to provide productive and cost-effective business solutions. As a Project Manager, I have worked around the globe reaching from the Prudhoe Bay Alaska to Hong Kong to Europe and Mexico. Working on massive projects like the Prudhoe Bay Sealift Project in Alaska to major manufacturing/distribution operations involving airfreight operations from Hong Kong to the USA, and warehouse management systems in Europe, I have developed team management and implementation skills enabling these and other projects to be completed on time and within budget.

I am well versed in financial systems and operations working several years in commercial banking industry and Public Accounting with KPMG. I have implemented Enterprise Resource Planning (ERP) systems for manufacturing/distribution, electronics and pharmaceutical companies with automated payments and receipts processing modules, saving significant labor expense while enhancing cash flow and receipts processes. As a Certified Information Systems Auditor (CISA) I also functions as an Internal Controls and Sarbanes-Oxley compliance consultant. I have also designed and implemented various manufacturing/distribution/financial EDI transaction systems for major manufacturers in the USA and Europe.

Citizenship: United States of America

Education: B. S. Management
University of Houston, Houston Texas

Certification: CISA - Certified Information Systems Auditor
CDP - Certificate in Data Processing

Computer Languages: COBOL, Assembler, FORTRAN

EDI Standards: ANSI X.12, EDIFACT, VICS, UCS, and HIPAA X12N

Computer Hardware: Intel based Servers, HP, IBM Systems, iSeries (AS/400)

ERP Systems Oracle, JD Edwards (JD Edwards (XE/World/E1)

Partial Project Summary

Implemented and automated the Procure to Pay Purchasing Department integration with key suppliers for a Mid-South Refinery. Designed electronic commerce transaction specification, standards and business processing procedures. Worked directly with suppliers to coordinate and test full purchase functionality for blanket ordering, stock and non-stock items controlled by the JD Edwards ERP system. Ongoing support on retainer/service agreement for over six years.

Managed, coordinated and designed third party interface requirements for an integrated hard-goods manufacturer during the conversion to and implementation of JD Edwards ERP/MRP system. Architected the data flow model to coordinate all transaction interfaces between third party modules, custom designed system and JD Edwards ERP system functions. Built intranet web-based documentation system to identify all data flow models, documentation and procedures and interface requirements.

JD Edwards integration remediation. Coordinate business process enhancements across all business units. Revise and implement new business practices to deal with newly installed JD Edwards ERP/MRP system. Plan integration process and electronic transaction processing for Order to Cash, Procure to Pay and banking/financial integration.

Project Manager and coordinator for major corporate system integration efforts for a large media distribution company. Trained project managers on techniques and approaches to organization and functional representation of project efforts. Developed composite project overview and plans for major corporate projects. Coordinated efforts of project managers and teams to achieve project objectives.

Conducted an analytical review and developed a requirement plan to migrate a national manufacturing company from a heavily modified JD Edwards system to Oracle Enterprise One (JDE). In addition, the electronic processing interface was analyzed and the immediate production failures were temporarily remediated; with a plan for a more permanent solution to be implemented with the migration to E1.

Coordinate and manage the conversion of electronic transaction resources and Order to Cash processing from a JD Edwards World to Oracle Enterprise One ERP system. Worked with deployment team to configure all E1 options and configurations for manufacturing, distribution and finance. Developed comprehensive data analysis and mapping for all transaction processing. Configured shipping and labeling systems in conjunction with Data Systems International (DSI) programs.

Managed the implementation of JD Edwards World 9.1 for a major mid-south heavy equipment manufacturer to implement a new electronic transaction processing effort for the automation of inbound order processing, outbound invoicing and outbound supplier order processing and invoice payment processes. Trained staff and documented procedures for revised business processes to accommodate the automation of order and procurement business processes.

Performed a transaction analysis and developed a systems requirement plan for a division of a major hard goods supplier to implement EDI transactions for the European

Skip Stein

Division with Far East manufacturing. This transaction system was based on EDI EDIFACT and the design interface was to a JD Edwards ERP/MRP system.

Managed the pre-implementation audit of Enterprise One (JD Edwards) shipping and distribution system for a Midwest plastics manufacturing company. Integrated Enterprise One systems to legacy shop floor manufacturing and injection mold production operations. Developed and deployed Advanced Ship Notice (EDI 856) and Invoice (EDI 810) transactions and Order to Cash operations with wholesale and retail customers across the USA and Canada.

Managed, coordinated and designed third party interface requirements for an integrated hard-goods manufacturer during the conversion to and implementation of JD Edwards OneWorld ERP/MRP system. Architected the data flow model to coordinate all transaction interfaces between third party modules, custom designed system and JD Edwards ERP system functions. Built intranet web based documentation system to identify all data flow models, documentation and procedures and interface requirements.

Designed, planned and implemented the financial accounting control interfaces for JD Edwards accounts receivable automated cash application interfaces to process trade account payments via EDI 820 Remittance/Payment Advice transactions. Planned and set up the Accounts Payable automated account reconciliation process, procedures and financial institution data interfaces. Deployed outbound electronic payment processing for vendor payments and employee disbursements via EDI 820 Remittance/Payment Advice to financial institutions.

Managed, coordinated and implemented the electronic transaction deployment for an International hard-goods manufacturer in conjunction with a JD Edwards OneWorld implementation. Project efforts included coordination with multiple divisions across the USA, Canada, Mexico, Australia and Europe. Centralization efforts of the EDI processing included a new implementation of an EDI translation tool, with new deployments of all purchase order, shipping and invoicing related transactions (EDI 850/855/858/860, 856/858/860/861/ 810/820/828). Accounts Payable EDI/EFT (820) transactions were implemented for payment of both vendor accounts as well as internal employee accounts. Trading Partner interfaces for inbound Purchase Order, Point of Sale, and order confirmations were implemented. Outbound Advanced Ship Notices (ASN/856), Invoice (810), Remittance/Payment Advice (820) and other supporting transactions were also deployed.

Developed and implemented internal Accounts Receivable (A/R) processes to enable the receipt of ANSI X.12 EDI remittance advice transactions (RA820) into the JD Edwards OneWorld Accounts Receivable system for a leading manufacturer of windows, doors and molding products. The project included building interfaces to J D Edwards (JDE) OneWorld Enterprise Resource Planning (ERP) A/R system for trade customer payments and remittance data, implementing automated cash application processes for JDE OneWorld A/R and training internal resources for executing the necessary manual A/R cash application activities. The EDI interface was implemented utilizing Liaison ECS data communications tools and Mercator transaction set mapping.

Deployed a trading partner system for a major electronics company that electronically supplies a comprehensive set of data and information to the Strategic Supplier/Partners.

Skip Stein

The two prime objectives of the business model are increased inventory turns while increasing the Customers' schedule flexibility in a zero stock-out, and Supplier managed MRP environment utilizing EDI and electronic commerce. The overall program objective is to share vital information with the Supplier/Partner to allow for the transitioning of the decision-making process from within the electronics company to the supply chain link with the greatest degree of control and flexibility; the electronics distribution channel.

Developed and implemented internal Accounts Receivable processes for an international household appliance manufacturer and distributor encompassing activities currently provided by a third-party service. Implemented EDI interfaces to JD Edwards A/R for trade customer payments and remittance data; established trade customer lock-boxes, built an automated cash application process for JD Edwards A/R, and staffed/trained internal resources for executing the necessary manual A/R cash application activities. Project included banking lock box interfaces be developed with electronic funds transfer processing and automated remittance advice processing utilizing EDI X.12 standard transaction sets with adjustment activity reported on EDI X.12 transactions.
